

SOLID FENCES AND DOORS « Large cattle 1800 height »

The panelled large cattle alley offers the best fluidity in the handling of large cattle:

- its design allows quiet transfer of animals in single stalls and avoids the stress linked to isolation.
- its size offers the best crossing conditions to animals between 400 Kg and 1t.
- the alley is formed of two 1.8m high partitions, 0.20m clear of ground, panelled to 1.40m. The free path is 0.82m wide.
- covered with 3 anti-overlap tubes and equipped with judiciously placed anti backup devices, the large cattle panelled alley allows the most serene and safe bovine transfer.
