

### INDIVIDUAL FRONT EXIT BOXES

Specially designed to ensure animal welfare during the waiting phases, our front exit boxes with watering trough allow the classification of cattle in the safest and quietest conditions.

Animals are easily set in individual boxes thanks to the magnetic anti-backup gates. Once complemented with our rolling transfer gates, our process guarantees operators safety.

***OUR INDIVIDUAL BOXES ALSO EXIST IN « ANGLE » OR « ZERO CONTACT » VERSION.***

**Welded Construction - Steel Quality S235 - Hot Galvanized Finish according to EN ISO 1461 2009**
