

MAN DOOR / SHELTER with metallic gate or anti-crossing flap

Man doors are emergency exit devices used in case of trouble with cattle. They offer a 32 cm wide opening. In lairages where less than 400kg cattle are accommodated, man doors should imperatively be equipped with anti-crossing flaps.

Welded Construction - Steel Quality S235 – Hot Galvanized Finish according to Standard EN ISO 1461 2009
